SUMMARY

Results-driven **Backend Developer** with **3+ years of experience** in Java/JEE development, specializing in building scalable applications using the Spring Framework. Proficient in microservices architecture, Restful API development. Demonstrate strong problem-solving skills with a proven track record delivering high-quality software solutions in Agile environments. Adept at collaborating with cross-functional teams, optimizing system performance, and driving projects to successful completion. Eager to contribute to a dynamic team and work on innovative projects leveraging emerging technologies.

SKILLS

Programming Languages: Java SE, Servlets, JDBC

Frameworks: Spring (Spring boot, Spring MVC, Spring Cloud, Spring Security, Spring Data JPA), Hibernate

Databases: Relational Database (MySQL, PostgreSQL), NoSQL databases (MongoDB)

Cloud Technologies: Amazon Web Services (IAM, EC2, S3, Cloud watch, API Gateway)

Methodologies: Agile, Scrum, Waterfall

Tools: Git, Postman, Gradle, Maven, Jira, Azure Boards, Docker, Fusion Auth, Swagger

Others: Restful API, Microservices, Event Driven Architecture, JWT, OAuth2 Authentication and Authorization, Junit.

WORK EXPERIENCE

Software Engineer - Magellanic Cloud Pvt Ltd

Project: Ivis-SaaS

Sept 2024 – Present | Hyderabad

- Developed **RESTful APIs** for **project and site group creation**, streamlining **customer** onboarding
- Designed and implemented a hierarchical user management system with **Scopes → Roles → Groups**, enhancing **access control** and **scalability**
- Developed secure Vault **Configuration API's**, Optimized performance with DTOs & reduced DB calls.
- Developed backend logic in a Java Spring Boot application using **Kernel services** and **Redis cache** to retrieve, map, manipulate, and persist data between DTOs and cache.
- Applied **Row-Level Security (RLS)** and **Field-Level Security (FLS)** for controlled data access.
- Integrated **Elasticsearch** for fast and efficient data search capabilities.
- Implemented **activity logs** for customer site management to improve auditability.
- Participated in **Agile SCRUM**, contributing to end-to-end **SDLC**.

Associate Software Engineer – Motivity Labs

Project: Digital Reef -Data Rewards

Nov 2022 - April 2024 | Hyderabad

- Integrated external APIs (Carrier-related) by analyzing API documentation and using Spring **Web Client** to meet business requirements
- Designed and implemented **CRUD operations** for MySQL and **optimized** database access using **Spring ORM and Spring MVC**
- **Monitored** application logs using **AWS CloudWatch** to identify and resolve issues efficiently
- **Designed and optimized database** queries by using **indexes** to improve query response time and performance
- Developed and executed **JUnit test cases** for **service layers, controllers, and repositories** to ensure **application reliability and maintainability**
- Designed **architecture diagrams** to document and improve project structure and **system workflows**

PROJECTS

Associate Software Engineer - Motivity Labs Pvt Ltd

April 2024 - Sept 2024 |Hyderabad

Project - Sagicor

- Developed a **feature-rich Flutter mobile application** from concept to deployment, **incorporating chat messaging, multimedia sharing, Google Drive file uploads, and profile management**
- **Implemented user authentication with Google, Facebook, and Twitter**, enabling seamless account management
- Integrated **Google Maps API for location-based services**, enhancing user experience with interactive maps
- Designed and integrated an intuitive calendar feature for efficient event and appointment management
